

Press Release 2011/06 #1

Castlegem to introduce the latest Intel E3 CPUs for their dedicated server and VPS range

With the launch of the brandnew Intel E3 CPUs and including this series into their product portfolio, Castlegem again prove they stay on top of the latest CPU development, offering their customers only state of the art and high performance technology.

Effective immediately, all VPS and dedicated server systems can be equipped with Intel's E3 CPUs, special offers are available for selected CPUs such as the E3-1260L.

Customers seeking a dedicated server or VPS will be delighted to see this surge in performance, speed, and cost effectiveness that is being made available to them now.

Castlegem is one of the first ISPs to integrate this series into their product range to move on to the next generation of high performance CPUs for dedicated servers available.

Please see

<http://www.castlegem.co.uk/dedicatedservers.php>

to configure your server or ask for even more individual dedicated servers setups.

During the month of June, special rates will apply. All dedicated servers specials are being sold on a first come first serve basis.
