

Press Release 2011/11 #1

Castlegem opening a new point of presence in Ashburn, Virginia

With ever growing demand Castlegem decided to launch a new presence right in the heart of the US Internet, in Ashburn, Virginia. With its prime East Coast location, Ashburn offers unparalleled connectivity both throughout the entire USA as well as to Europe, specifically the major exchanges in London, Paris, Frankfurt, and Amsterdam.

This top location so far offers Virtual Private Server (VPS) services on high end servers using the latest Intel Sandybridge technology. All hardware is 100% server grade, including Enterprise disks with Hardware Raid controllers. No desktop components are ever being used.

Castlegem has been providing VPS services for many years now, without the numerous disadvantages that often come with shared resources such as I/O bottlenecks, slow CPUs, or network congestions. Castlegem guarantees resources are not oversubscribed.

The Ashburn VPS all come with XEN HVM and 1024MB RAM, 20GB Hardware Raid disk space, Top Tier Feeds, and 500GB of premium bandwidth in and out each by default, and we guarantee a limit of 10 guests per node. Naturally, upgrades are available. If your specific requirements require less resources, please do not hesitate to enquire.

Castlegem supports both Linux and Windows guests, and Castlegem is a proud Red Hat partner, CentOS and LXCenter (Kloxo, HyperVM) sponsor. Castlegem actively supports over 40 projects for sustainable development.
