

Press Release 2012/06 #1

Castlegem offering specially tuned FOREX VPS and introducing E3-v2 Ivybridge

Castlegem is pleased to announce the immediate availability of special VPS setups that are geared towards FOREX and stock market traders.

All servers feature the latest E3(v2)/E5 CPUs, and come with a preinstalled and readily configured Windows 2008 R2 Server release.

Castlegem have taken meticulous care to provide excellent latency, paired with high throughput and resilient, redundant feeds in order to offer state of the art service for professional traders.

Castlegem's points of presence on the East Coast in the USA, as well as in London and Manchester offer an excellent location for trading. Our Ashburn location is situated at one of the most important internet hubs of the United States, close to the financial centres in New York. Our Manchester and London locations offer the same high end service and ideal trading setup for London's financial centre.

With the new Forex VPS setups, Castlegem have also released and put into production the latest E3-v2 Ivybridge CPUs. Effective immediately, all new single CPU VPS nodes and dedicated servers that come with an E3 CPU will be featuring the new v2 setups – more performance and lower power consumption at the same price.

All dedicated servers and Virtual Private Servers are branded hardware with full lifetime support, and offer a wide range of additional options such as managed system, 24/7 sysadmin availability, redundant servers, backup/recovery strategies, etc.
