

Castlegem opening a New York City PoP

We are proud to announce the opening of our tenth point of presence: New York City. We have chosen Telehouse Chelsea as our data centre for its outstanding facility in terms of available connectivity, state of the art technology and proximity to financial trading centres.

This top class point of presence will be ideal for clients seeking trading opportunities with an edge over their competitors as well as eCommerce sites in need to serve both their United States and European clientele.

We will be providing high end virtual private server and dedicated server services along with tailor made colocation. As with all other of our points of presence, New York will only feature the latest Intel CPU servers along with high speed, fast throughput, and low latency multi homed bandwidth.

Get in touch to find out about our latest service improvements!

Castlegem: *Enterprise performance for the community.*
