

Castlegem doubling Vienna capacity

We are happy to announce the doubling of our capacity in Vienna! Seeing a strong surge in demand for services in Vienna, we have used the summer months to build additional infrastructure as well as provision and deploy additional servers.

As always, clients will have a choice between feeds (or opt for both!): AS8218, our main AS, and nLayer.

Vienna is an ideal point of presence for those clients who value high availability setups in the heart of Europe, in a data centre that can look back on over a decade of success by now.

We offer our entire range of services in Vienna: virtual private servers, dedicated servers, and colocation, along with bespoke solutions for management.

Get in touch to find out about our latest service improvements!

Castlegem: *Enterprise performance for the community.*
