

## **Castlegem AS18845 now supporting IPv6 via BGP**

Castlegem are pleased to announce that – after last month's successful completion of transit feeds with the addition of Level3 – we are now also running IPv6 BGP sessions with all our transit providers: AMC, Init7, Cogent, and Level3.

The mix can be checked at HE's BGP site: <http://bgp.he.net/AS18845>

With the exception of AMC we take full detailed routes from all carriers again.

Clients will be pleased to find superb latencies and routes that match the outstanding quality of our IPv4 routing.
