

## **Castlegem – Prague PoP now offering SSD & KVM and doubling capacity**

Last month Castlegem announced that all VM nodes to come were pure SSD only anymore.

We have used this opportunity to double our capacity at our Prague (Czech Republic) point of presence, along with making the move to SSD and KVM as preferred virtualisation technology.

As always during such company wide upgrades, Castlegem allows existing clients with existing services to migrate to the better VPS setup at no additional cost!

Get your bespoke development and hosting solution from Castlegem – the diamond hosting company among ISPs. Contact us today!

**Castlegem: *Enterprise performance for the community.***
